CORE EXPERTISE

- Full Stack Java Dev
- Agentic AI
- Generative AI (GenAI)
- Software Architecture
- Microservices Design
- AI Integration
- Cloud (AWS)
- Team Leadership
- CI/CD & DevOps
- Agile / Scrum
- Client Management
- Kafka

AGENTIC & GEN AI

Tools
Oracle AI · Code Assist
ChatGPT / OpenAI API
Claude AI · Cline · Codex
Applied In
Agentic AI Workflows
Multi-Agent Orchestration
LLM Integration · RAG
Prompt Engineering
AI-assisted Coding

TECH STACK

Languages
Java · J2EE · JS · HTML · CSS
Frameworks
Spring Boot · MVC · Hibernate
AngularJS
Databases
PostgreSQL · Oracle · MS SQL
MySQL · MongoDB

CERTIFICATIONS

OBDX Certified — Oracle '26
FLEXCUBE Basic — Oracle '26
OCI GenAI Professional '26
Oracle Java Certified '26
AWS Cloud Practitioner

EDUCATION

BE – CS & Engineering
CGPA 6.89 / 10 | 2014

PROFESSIONAL SUMMARY

Results-driven Full Stack Java Developer and Principal Consultant with 10+ years of expertise across enterprise banking platforms, Agentic AI integration, autonomous workflow design, and Agile delivery. Proven leader managing global banking implementations across the Middle East and Africa, bridging technical architecture with measurable business outcomes across Banking & Finance, HRMS, and CSR domains.

10+ Years Experience · 4 Tier-1 Companies · 40-Member Teams Led · 30% Efficiency Gains · 3 Global Banking Markets · 5 Certifications

WORK EXPERIENCE

Oracle India | January 2025 – Present

Principal Consultant

- Lead cross-functional teams of 6–13 engineers across design, development, and delivery of enterprise banking solutions for global clients across 3 markets.
- With 3 simultaneous global bank deployments in flight, resolved critical platform architectural bottleneck using AI-driven root-cause analysis — restoring system efficiency by 10% and preventing multi-week delivery delays.
- Identified and eliminated performance bottlenecks across banking platform serving millions of customers — increasing overall application efficiency by 30%.
- Designed structured deployment methodology saving ~15 days per cycle, estimated 20% reduction in delivery cost across 3 client rollouts.
- Integrated Agentic AI capabilities to automate banking workflows; reduced manual intervention by automating onboarding, compliance checks, and transaction routing.
- Established Oracle AI-powered CI/CD pipelines and AI-assisted database management — cutting release cycle time by 10% and improving production data integrity.

Tech: Java · Spring Boot · OBDX · FLEXCUBE · Agentic AI · Oracle AI · REST API · Oracle DB · AWS · Jenkins · Microservices

Oracle Banking Projects

OBDX (Oracle Banking Digital Experience) Java · Spring Boot · Microservices · Agentic AI

- Delivered end-to-end OBDX implementations for Abu Dhabi Bank, UCB Bank, and FBC — covering retail banking, corporate banking, and digital onboarding for millions of customers.
- Integrated Agentic AI for automated customer onboarding, transaction routing, and compliance checks; reduced manual processing time significantly.

FLEXCUBE Core Banking Enhancements Java · Oracle DB · REST API · CI/CD

- Loans, deposits, and GL module enhancements; Oracle AI CI/CD pipelines cut release time by 10%; AI-assisted DB management boosted query performance.

IBM India | August 2023 – December 2024

Lead Technical Advisor / Team Lead

- Managed 13 mission-critical banking applications (DMS, RSA, Internet Banking, Merchant Banking) leading a team of 40 across L1, L2, and L3.
- Maintained zero major production outages across all 13 applications, delivering 99.9%+ uptime SLA throughout a 16-month tenure.
- Implemented Kafka in 2 high-volume applications processing millions of events/day; introduced Base64 image compression and file upload validation.
- Defined WBS, timelines, and resource plans ensuring consistent on-time delivery; managed stakeholder communications across client and IBM leadership.

Tech: Java · Spring Boot · Kafka · REST API · PostgreSQL · Jenkins · Git · Jira

Wipro Limited | November 2020 – August 2023

Senior Project Engineer

- Built and deployed REST APIs across SDLC stages; implemented Spring Security token-based auth for Banking Securities Project serving thousands of users.
- Developed AngularJS front-ends; led code reviews, JUnit test suites, and TDD enforcement — improving defect detection rate and code coverage.

Tech: Java · Spring Boot · Spring Security · AngularJS · REST API · JUnit · Git · Maven

Synergy Connect Data Innovation | January 2017 – November 2020

Senior Developer

- Built CSR Global Platform (Spring Boot, PostgreSQL), E-Peek Pahani for TATA Foundation/Maharashtra Govt (Microservices), KSWA, and ICICI Foundation projects on Spring MVC & MongoDB — serving 100,000+ beneficiaries across Maharashtra.
- Mentored 5+ junior engineers; enforced architectural standards and coding guidelines across all projects.

Neterson Technologies | September 2015 – December 2016

Software Engineer

DOMAIN

Core & Digital Banking
Banking Finance · HRMS
CSR & Data Processing

LANGUAGES

English · Hindi

- Designed and built HR Align+, an HRMS product — developed features end-to-end including payroll, attendance, and employee management modules.

FREELANCE & INDEPENDENT PROJECTS

New Bharat Skills — EdTech Learning Platform — *Agentic AI · Spring Boot · React · PostgreSQL*

- Designed skills-development EdTech platform to bridge India's digital skills gap — Agentic AI delivers personalised learning paths and auto-generates course content for learners across tier 2 and 3 cities.
- Built autonomous AI agents handling 100% of student queries, progress tracking, and course recommendations with zero manual intervention — enabling massive scale without support staff.

denml.com — AI-powered Web Platform — *Agentic AI · Java · Spring Boot · OpenAI API · AWS*

- Architected and built denml.com — a full-stack platform with multi-agent orchestration for intelligent content delivery, real-time search, and user personalisation.
- Deployed on AWS with CI/CD pipelines; OpenAI API integration enables real-time agentic task handling — platform serves active monthly users with zero manual content ops.

TECHNICAL SKILLS

Agentic & Generative AI: Agentic AI Workflows · Multi-Agent Orchestration · LLM Integration · RAG · LangChain · Oracle AI · OpenAI API · Claude AI · Cline · Codex · Prompt Engineering
Oracle Banking: OBDX · FLEXCUBE · Core Banking · Digital Banking · AI Integration · CI/CD Automation
Backend: Java · J2EE · Spring Boot · Spring MVC · Hibernate · REST API · Microservices · Kafka · Spring Security
Frontend: AngularJS · JavaScript · HTML · CSS · jQuery
Databases: PostgreSQL · Oracle DB · MS SQL · MySQL · MongoDB
Cloud & DevOps: AWS (EC2) · Jenkins · Git · Bitbucket · Docker · SonarLint · CheckMarx · Maven · Jira · Swagger · NGINX · Tomcat
Methodologies: Agile · Scrum · SDLC · TDD · System Design · WBS Planning
